

Inclusion in the Classroom

TIPS AND RESOURCES

Why is it important to include students with disabilities in general education classrooms?

Inclusion Is a Legal Right

In 1975, the Education for All Handicapped Children Act was passed to ensure that children with disabilities are given the opportunity to receive a public education. In 1990, 1997, and 2004, reauthorizations of this Act took place, and the law came to be known as the Individuals with Disabilities Education Act (IDEA). IDEA mandates that not only should individuals with disabilities be provided a public education, they also should have the right to learn in the least restrictive environment. This means that students with disabilities, both in public and in private schools, are, to the maximum extent possible, to be educated in classrooms alongside students without disabilities.

Inclusion Is a Moral and an Ethical Right

Children with disabilities are first and foremost children. They will benefit from the same experiences that are desirable for all children, for the same reasons. They also will benefit from avoidance of the same undesirable experiences, for the same reasons. Inclusion provides opportunities for socialization and friendships to develop. It provides a sense of belonging and appropriate modeling of social, behavioral, and academic skills. Including children with disabilities in general education classes models acceptance of diversity. It teaches children how to relate with others of different abilities.

Inclusion Is a Civil Right

Separate is not equal. If something is offered to all children, it must be accessible to all children. Access should not be denied based on disability or any one characteristic. Children with disabilities have a right

to go to the same schools and classes as their friends, neighbors, brothers and sisters. They have a right to be afforded equal opportunities.

Inclusion Works

Some research has shown that inclusion may improve learning and academic performance for *all* students. Children also have an opportunity to learn to accept individual differences and to overcome misconceptions about disabilities.

What are some of the practices that promote inclusion?

- Appropriate supports and services are available in general education classes.
- Individualized education programs are well-designed.
- Students with disabilities are considered in decisions that affect all students.
- Teacher preparation adequately addresses inclusion of students with disabilities.
- Disability is considered when teaching about diversity.

What are some of the barriers to effective inclusion practices?

- Funding is used as a reason for not identifying and appropriately supporting a student's needs.
- There is a separation between general and special education—two systems.
- There is lack of accountability and a failure to collect data objectively.
- There are low or no expectations for students with disabilities.
- There is a fear that general education classrooms will be disrupted if students with disabilities are included.

What can be done to address these barriers?

Get involved in the schools. Work with the PTO to promote inclusion and share information. Ask to join the district's strategic planning committee and/or action teams. Start an inclusive education committee. Create a loaner library with inclusion information and materials. Meet regularly with whomever in the district will listen—superintendent, teacher, guidance counselor, and others.

Inclusion in the Classroom

Tips and Resources

Write, call and/or visit your local, state, and federal legislators regularly. Let them hear your personal stories. Thank them for their help and let them know you are a voter! If they receive as little as 20 or more contacts about an issue, it will get attention. Your experience is expertise, and you can provide relevant information to policymakers.

Share inclusion success stories with parents and professionals. Talk at early intervention meetings and help them envision possibilities for schools. Attend conferences, network, and join planning committees. Start an inclusion support group.

Support people with disabilities in sharing their own experiences and stories. Provide opportunities for students with disabilities to speak for themselves. Help involve adults with disabilities in the schools and legislature. Speak or suggest speakers to other organizations such as Rotary Clubs, PTO's, and faith groups to spread the word about inclusion.

Enlist others. This is not a disability issue. It is a societal and an educational issue. Get family, friends, and neighbors involved. Ask your congregation or community group to become active. Work with other groups interested in improving education for all children. Work with other groups interested in children's issues.

How We Can Help

The **Vanderbilt Kennedy Center** works with and for people with disabilities and family members, service providers and advocates, researchers and policy makers. It is among only a few centers nationwide to be both a University Center for Excellence in Developmental Disabilities and a national *Eunice Kennedy Shriver* Intellectual and Developmental Disabilities Research Center. We promote the independence, self-determination, integration, and inclusion of individuals with disabilities and provide supports for families.

The **Family Outreach Center** provides families with a single point of entry into the many services and supports of the Vanderbilt Kennedy Center, Vanderbilt University, and the community, including research projects, clinics, social work services, and recreational and arts programs. Contact familyoutreach@vanderbilt.edu, (615) 936-5118.

Tennessee Disability Pathfinder is a resource and referral service that provides free phone, web, and print resources in English and Spanish that connect the Tennessee disability community with service providers and resources. For information on Tennessee education services, click on the "Education" icon, or click on the "Search" icon and select "Special Education Services" for a list of service by county. See www.familypathfinder.org, (615) 322-8529, (800) 640-4636

The **Susan Gray School** serves children with developmental disabilities and children who are at risk for developmental delay. This preschool has the distinction of being the first nationally recognized early intervention program to include typically developing children in educational settings with children with disabilities.
